

Symposium for Effective Teaching and Learning in the Sciences

September 1st, 2016 | 8:30 am – 4:30 pm | Science Building, UOIT

Join us for a day-long series of talks, interactive workshops, demos and panels focusing on modern methods of effective teaching and learning in science at the university level.

Sign up for this professional development opportunity to learn the latest on education research and evidence-based pedagogy for the laboratory, tutorial, small class, or massive lecture hall.

Come out and experience the latest technological advances in student engagement, communications, analytics, and learning outcomes.

Catch our keynote speaker Professor Simon Bates of UBC as he defines the ideal 21st Century Educator.

Connect with your colleagues for a fun and informative day and get invigorated for the upcoming academic year!
